Is it possible to reduce your supply cost and not compromise the quality of the products you use every day?

3M, Dentsply and Kerr dominate the supply market, and if you have purchased any of their products, you know how expensive they can be. In addition, they bring to market new products every year, and try to convince you that you must have these products at even higher prices. Many companies have introduced generic products, and have sacrificed quality in order to save you money. These products lack the quality that your practice and patients deserve. Dental Deals Online has partnered with leading manufacturers to create a line of products that cost the same as the "house brands" but don't sacrifice the quality of the products. We are able to accomplish this because we have been in the dental industry for over 36 years and have made contacts and connections all over the world. Whether it's Flowable Composite from Israel or Evacuation Tablets made right here in the United States, we have done our homework.

We will still offer you the name brand products at discounted prices, but give you the option to try these "alternative" brands risk free. If you are not satisfied with any of the MARK3, Cargus or Cory brand products, we will give you a full refund no questions asked. Ask us for samples of any of these products and we will ship them out free of charge. We believe that better quality and less expensive products exist in our market and we have made it our mission to bring them to you.

Sincerely,

Gavin Markiet
